

# FIVE REASONS WHY CUSTOMERS CHOOSE REMEDIANT PAM

Remediant SecureONE is an agentless, vaultless and a cost-effective PAM solution

**1** **Continuous, Real-Time, and Agentless Discovery** of all admin access sprawl across **Windows, Linux** and **Mac** systems

SCAN **10,000 ENDPOINTS** IN APPROXIMATELY 25-30 MINUTES

**2** **Executives and Practitioners** can **view and analyze their privileged access risk** to determine a path to quickly **reduce their attack surface**

**3** **One Click, Instantaneous Removal (milliseconds/endpoint)** of undetected and unnecessary 24X7 privileged accounts sprawl reduces attack surface

**4** **Administer Just-in-Time (JIT)** privileged access with MFA to enable **Zero Standing Privilege (ZSP)** and implement **Zero Trust security**

**5** **Industry's First EDR Integration** for privileged session recordings: Leverage your investments in **SentinelOne, CrowdStrike Falcon** and **VMware Carbon Black** to proactively respond to privileged session-based nefarious incidents

## WHERE ARE YOU ON THE SPECTRUM OF LATERAL MOVEMENT PROTECTION?

	STAGE 1 <b>Active Directory:</b> Typical Configuration	STAGE 2 <b>CyberArk and Legacy PAM:</b> Password Vault / Secret Server	STAGE 3 <b>Microsoft LAPS and Agent-Based Solutions:</b> Local Admin Management	STAGE 4 <b>Remediant:</b> Privilege Account Access Control
<b>This stage offers:</b>	Convenience with 24x7x365 privileged access	Managed credentials, but still with 24x7x365 privileged access	Local admin password management only, with no time limits	Zero Standing Privilege, Just-in-time administration with MFA
<b>And results in:</b>	A large attack surface that facilitates Lateral Movement	Privilege sprawl that facilitates Lateral Movement	Inconsistent admin account coverage, not intended to address Lateral Movement	Robust protection against Lateral Movement
<b>Access:</b>	All-time	Sometimes	One-Time	Real Time
